• Internal Continuous Evaluation System and place

- Question paper pattern, evaluation of assignments, seminars and group discussions for continuous internal assessment was framed and drafted as a part of academic rules and regulations of Chalapathi Institute of Pharmaceutical Sciences.
- Suitable weightage is given to the topics based on syllabus, importance of topic and course objectives. Assignments are allotted to the students in each course and the students are informed to submit in the written format within a stipulated period of time. The concerned faculty evaluates the assignments in terms of course content, linguistic and mode of presentation. Out of all assignments collected, the best performance was appraised and it is circulated among other students for their reference, so that all students will be benefited. The topics for assignment are mostly related to course outcomes of a course, so that the student will be able to develop self learning skills and ultimately course outcomes are achieved.

Linguistics of question paper is in link with blooms taxonomy as the questions impart the concept of remembers, understand, apply, analyze, evaluate and create.

- Two internal (sessional) examinations shall be conducted for each theory/practical course as per the schedule given by the institution. Question papers are prepared in a way to cover the course outcomes and the students performance can be easily assessed. Prepared question papers by the concerned faculty are verified by head of departments and confirmed. At the end of sessional examinations, concerned faculty evaluates the question paper to ensure that given questions are from course outcomes perspective and on the question paper itself relative course outcomes for each question is marked., which is further used for calculation of course outcome attainment from sessional examination.
